-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "storage bin", "a net", "a basket", "a storage rack", "a fastener selected from the group consisting of hooks, snaps, and hook and loop fasteners" as set forth in claims 6-10, 22-26 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

Art Unit: 3711

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 6-10, and 22-26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicant failed to provide disclosure for the structural features as set forth in these claims.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5, 11-21, and 27-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chan U.S. Patent 6,641,455.

Chan disclosed a station (1) comprising an entertainment object holder (3); at least one substrate (7), visually associable with the station, removably mounted to the holder (Fig. 3); objects (33, 35, 37, 39) affixed to the substrate; the station including a top surface (5) and support legs; one or more nubs on one or more support legs (see Figs. 1 and 2). It is noted that Chan only show one substrate (7) removably attached to the holder instead a plurality of substrates as set forth in claims 1 and 17. However, Chan also disclosed that the station could be used in other environment such as a

Art Unit: 3711

laboratory, a kitchen, a vanity, etc. (col. 3, lines 18-35). Accordingly, it would have been a matter of design choice to provide additional substrates to accommodate any specific environment.

Regarding claims 2, 3, 18, and 19, the claimed invention failed to specifically recite how the disinfectant is connected or any physical relationships between them. It is the issues of cleanliness and disease prevention; disinfectant is typically available at or near the play station for the reason as set forth above.

Regarding the method of managing the play station in claims 17-32, the steps of maintaining play objects as set forth therein are very well known in the environments such as preschools, day-care centers. It would have been a matter of common sense to incorporate such basic maintenance steps to the play station of Chan.

Regarding claims 11-16 and 27-32, it is noted that Chan failed to specifically disclose various features of the substrates and station as set forth therein. However, such features are well known in the art such as educational toys and play environments. Accordingly, it would have been a matter of design choice to provide the play station of Chan with various well known educational teachings to accommodate any specific play level.
